## Population

A region's economy thrives or dives because of the people who choose to live there. That choice may occur by being born there and desiring to stay, or a more deliberate one of choosing to relocate from somewhere else. Monitoring change in the size and movement of population is an important barometer of well-being. Some of us monitor these changes as an insect might gauge the shifting sands while most don't pay much attention. But the barometer is a good metaphor for population change since it can presage more notable events, such as lackluster business attraction due to lack of workers.

Population Over Time					
	1988	1993	1998	2003	2008
Total Population	24,176	25,933	27,251	27,167	27,400
Change Since 1988		1,757	3,075	2,991	3,224
Pct. Change Since 1988		7.3%	12.7%	12.4%	13.3%

## Components of Population Change 2007 to 2008

	Number
Net Domestic Migration	-22
International Migration	2
Natural Increase (births minus deaths)	114
Births	388
Deaths	274

A bar chart titled "Components of Change" showing the breakdown of population change from 2007 to 2008. The y-axis represents the number of people, ranging from -40 to 140 in increments of 20. The x-axis lists the components: Domestic Migration, International Migration, and Natural Increase. Domestic Migration is represented by a blue bar extending downwards to -22. International Migration is represented by a small blue bar extending downwards to 2. Natural Increase is represented by a green bar extending upwards to 114.

Component	Number
Domestic Migration	-22
International Migration	2
Natural Increase	114
